**FEATURE UPDATE**

**DOMINION  
CONNECT**

# Enhanced Features

*Released September 2017*

---

**Results Calendar**

**Patient Results List View**

**Specimen Tracker**

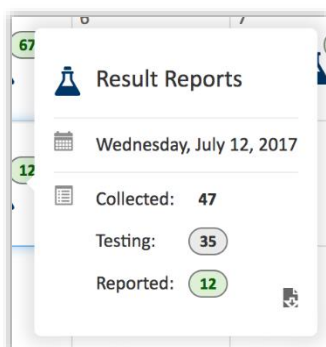

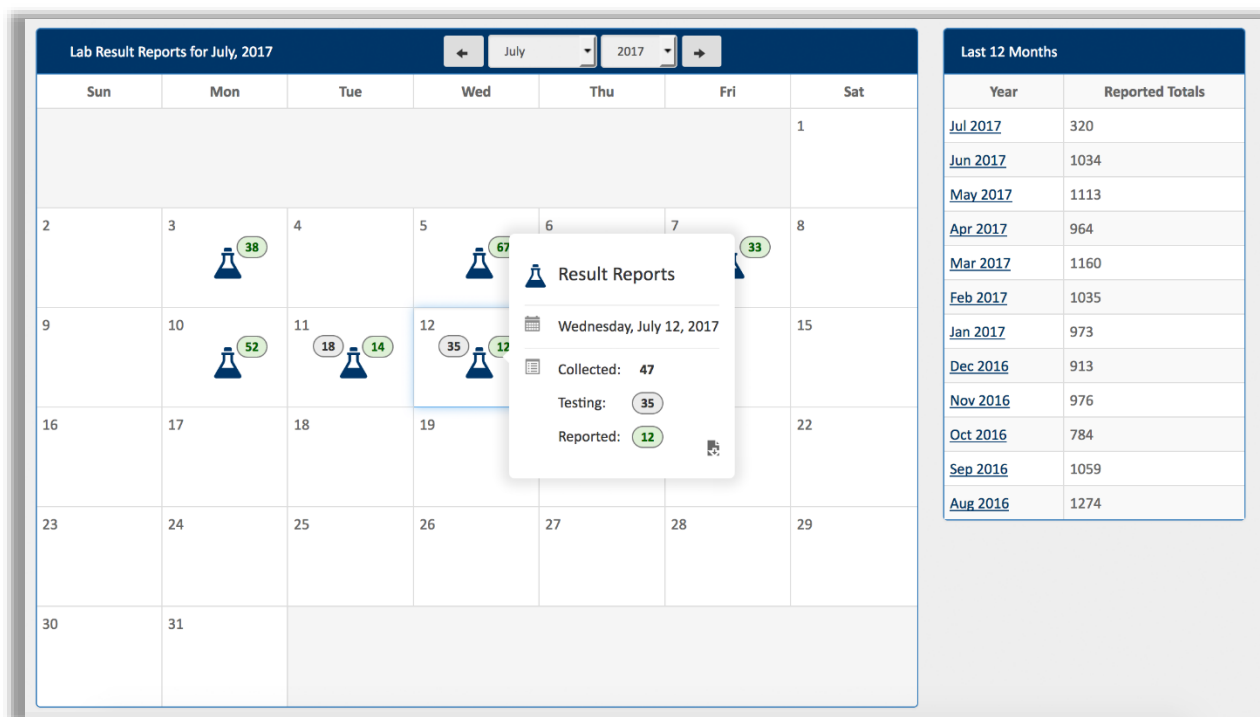

**Optimized Data Queries**

## NEW USER INTERFACE

# Results Calendar

Customers utilizing Dominion Connect™ will notice a new look and improved functionality to the **Results Calendar** interface. The calendar now reflects the appropriate days of the current (or selected) month. The following updates will improve the user experience:

1. The current day is highlighted when viewing the current month's calendar
2. Visual cues now highlight both specimens collected as well as reported to represent the true number of specimens for a given day
3. *Previous* and *Next* arrows have been incorporated to allow users to more easily navigate from month to month in the top of the window
4. The *Last 12 Months* side bar now includes active links to allow users to click and jump to a corresponding month in the 12-month historical results calendar
5. Simplified the look of each calendar day by replacing text with graphic icons and two alert bubbles that distinguish specimens testing (grey) and specimens reported (green)
6. Relocated the *Results Download* link to the Results pop-up window
7. Added a pop-up window that gives more information regarding the activities of the day, including: Full date; Number of Collected, Testing, Reported; and a link to download results (zip)

## Patient Results List View

- GREY: Testing in progress (collected)
- **BLUE (bold)**: Partial result not viewed
- BLUE: Partial result viewed
- **ORANGE (bold)**: Final result not viewed
- ORANGE: Final result viewed

## NEW FEATURE

# Specimen Tracker

A new feature called **Specimen Tracker** is now available through Dominion Connect™. Users may access a pop-up window that provides additional insight into the process from specimen collection to final result report, by clicking on any of the linked data fields in a selected accession row.

- **Specimen Tracker** shows four major specimen lifecycle events: **Collected**, **Received**, **Testing**, and **Reported**
- **Specimen Tracker** shows the additional event of a **Partial Result**, if available, with a link to the actual result report
- **Specimen Tracker** indicates the date each milestone occurred (i.e., Collected, Received, Partial Result, and Reported)
- **Specimen Tracker** shows the additional event of **Invalid** if an error such Fatal Flaw, Rejected and Drug Screen Not Reported (DSNR) occurs with a link to the actual result report

## NEW FUNCTIONALITY

# Optimized Data Queries

Queries are now acquiring additional data behind the scenes and run significantly faster, providing a better user experience.
